

Year 10 GCSE

(1) To complete the mini project and send it to me.

If completed I need to see it as a whole project. Do not worry if you could not cook, but you should be able to complete all the research.

(2) Explain the meanings of these words:

- Tenderise
- Marinate

(3) When asked to find the Functional and Chemical properties, what am I asking you to do?

(4) What do I mean when I talk about food spoilage and contamination?

(5) If you have a GCSE textbook then you need to start reading it and answering the test questions. These books are in my room and you need to speak to a member of staff to retrieve them and sanitize before they be can used. Once you have one you will need to keep it during the holiday so that you can continue your learning.
