

Year 10 GCSE

Revise the different raising agents

- Heading Raising agents
- What scientific reactions take place when you use each raising agent?
- What happens to the ingredients you are using?
- what is the balloon experiment? what does it prove?
- How can we tell which flour has a higher level of gluten.
- What experiment can we do to prove our theory. (I know we can cook a recipe so please do not give this as an example).
