Term 5

This Term our topics are **Investigating Our World** and **Animals, including humans.**

This term, Mr Fairbrother will be doing most of the teaching in class. We will be using learning about map symbols and locating different cities around the world. We will also look at climate zones and settlements.

In our Science learning, we are focussing on humans this term. We are starting by looking at healthy eating before finding out about our skeletons and muscles and how they work.

We are starting the term looking at shapes in Maths. This will include 2D and shapes, including different triangle and quadrilateral types. We will also look at angles and symmetry.

The focus for our English learning this term, will be traditional tales. We will look at the structure of some of the tales we know and end the term by writing our own story. We will use this to practice editing, improving and assessing our own work.

Key Vocabulary

angle symmetry triangle equilateral isosceles scalene
quadrilateral map symbol feature human physical
location climate weather skeleton muscle healthy diet
